

# Priority Registration for Students with Disabilities

## Summary

Some students with disabilities are eligible for priority or early registration status at Columbus State University.

## Purpose

This document explains the eligibility of advanced priority registration for students with disabilities.

## Policy

Due to the nature of certain disabilities, it is necessary for certain students with disabilities to register in advance for campus-wide early registration. This is usually the week before the campus-wide early registration. Not all students with disabilities are eligible for advanced priority registration. Students who have mobility difficulties, have to adhere to certain schedules because of treatment and other problems are examples of students receiving advanced priority registration. Students who are eligible for campus-wide registration are notified via email. Students who are eligible will need to meet with their advisors to complete a schedule. The Center for Accommodation and Access does not advise students in the selection of courses, but are willing to address any questions or concerns regarding their schedule.
